## MODULE SYLLABUS

Course	Master of Business Administration (University of London)
Module Title	Strategic project in leadership
Module Syllabus No. (if any)	BAM905
Syllabus / Content / Learning Outcomes	<p>This module is a capstone project involving the development of business research skills and their application to real world business and accounting related problems. Core to the project is the requirement for students to acquire an underpinning in research methodology, applying research skills to the collection and analysis of data within a business related scenario. This involves identifying and analysing data and information in relation to business and accounting challenges, researching alternative solutions, and applying a judgment based on assessment of the evidence.</p> <p>Learning outcomes: Upon successful completion of the module, students should be able to:</p> <ul style="list-style-type: none"> <li>• Describe both the practical application and underlying philosophy of research methods within the business studies arena, with a specialist focus on the accounting sub-discipline</li> <li>• Identify appropriate research and enquiry techniques to assess corporate challenges within the wider business context</li> <li>• Identify, acquire and analyse financial and other data for business related problems</li> <li>• Synthesise and use information and knowledge effectively</li> <li>• Undertake, and communicate the results from, an independent piece of research work</li> <li>• Creatively deal with complex corporate problems in a professional capacity</li> <li>• Apply theoretical models to real world business solutions</li> <li>• Identify, evaluate, and critically appraise alternative solutions to business problems</li> <li>• Tangible work as evidence to themselves and existing/potential employers of capabilities relating to independent research and thinking</li> <li>• Research design skills (including development of data collection and analysis strategies)</li> <li>• Numeracy and quantitative skills applied to business management decisions</li> <li>• Critical self-reflection applied to business practice and experience</li> <li>• Complex problem-solving skills to support corporate decision making</li> <li>• Effective communication skills of complex solutions to business related decisions (including effective use of written presentation tools/reports)</li> <li>• Effective skills of the use of information technology</li> <li>• High personal effectiveness, applying critical self-awareness and personal resource management in the context of a diverse business environment</li> </ul>
No. of Teaching Hours	Contact Hours – Lectures, Seminars & online activity (22 x 3) = 66 Independent Preparation, pre-reading and analysis = 234 TOTAL = 300
Teaching Methods	Lectures, tutorials, case-studies analysis, research journals and group discussion.
Assessment Methods and Weightages	<p>Coursework Item 1 - a research proposal of 2,000 words in length (maximum) outlining the research question and methods to be adopted in its investigation, including a literature review – 30%</p> <p>Coursework Item 2 - for projects in Financial Accounting students will be required to analyse data using a database and basic statistics analysis packages (i.e. SPSS) and then summarise their results, these projects will be mainly quantitative in nature and 8,000 words in length (maximum) – 70% For projects in Management Accounting students will choose a company, choose a research methodology, analyse results and present an analysis. These projects will be mainly qualitative in nature and 8,000 words in length (maximum)</p>
