## MODULE SYLLABUS

Course	Postgraduate Diploma in Business Administration (Accountancy)
Module Title	Corporate governance and ethics
Module Syllabus No. (if any)	BAM505
Content	<p>The module covers issues affecting both the business community and the wider societal effects of the debate on corporate governance. Conceptually, the module is divided into four parts.</p> <p>The first investigates the origins of modern corporations, examines the most relevant corporate theories (e.g. concession theory, aggregate theory, realist theory) and analyses the influence that these theories have exerted on corporate governance.</p> <p>The second part deals with some of the most important corporate governance legal issues, analysing them from both a theoretical and practical perspective (e.g. the Dodd-Berle debate concerning the relationship between shareholders and managers, the concept of islands of conscious power analysed by Coase, the agency cost theory developed by Jensen and Meckling).</p> <p>In the third part, the module focuses on the UK corporate governance debate and the various corporate governance solutions originating from it. Specifically, it examines the origin and evolution of the UK Corporate Governance Code, analysing the work of the various relevant committees up to the Walker Report, 2009.</p> <p>Finally, the last part of the module deals with several scenarios in which the adoption of unethical corporate governance approaches led to the infringement of fundamental rights and produced adverse effects in the corporate world and broader society (e.g. the Kreuger and Toll Scandal, the collapse of Enron, the financial crisis). As a result, the module establishes essential links with other relevant modules in several areas (e.g. corporate management, corporate finance).</p>
